Fig : Book List Entry

Process – 1

The IICT Library maintains records of its books using several key columns in its database:

1. **Title** – This column stores the full name of the book for easy identification.
2. **Accession No** – A unique number assigned to each book when it is added to the library's collection. It helps track and manage inventory.

Example: I001430

- I may refer to a specific category or department (e.g., IICT).
- 001430 is the unique serial number for that book.

This number is crucial for issuing, returning, and cataloging.

3. **Author/Editor** – Lists the name(s) of the person(s) who wrote or edited the book.
4. **Edition** – Indicates the version of the, which helps differentiate between updates or revisions.
5. **Volume (Vol)** – Used when the book is part of a multi-volume set.
6. **Place of Publication** – The city or location where the book was published.
7. **Publisher (Pub)** – The name of the company or organization that published the book.
8. **Date of Publication** – The year or full date when the book was published.

9. **Source** – Where the book was obtained from (e.g., donation, purchase, or gift).
10. **Binding** – Specifies the physical type of the book:
- PB for Paperback
 - HB for Hardbound
11. **Pagination** – Shows the total number of pages in the book, sometimes including preliminary pages.
12. **Bill No and Date** – Refers to the purchase bill number and date for record-keeping and audit purposes.
13. **ISBN** – International Standard Book Number, a unique identifier for books, used globally to track and catalog books.
- Example:** 978-3-16-148410-0
- 978 is the Brookland prefix.
 - 3 indicates the language group (German-speaking countries).
 - 16 is the publisher code.
 - 148410 is the book's item number.
 - 0 is the check digit for validation.
- ISBN helps ensure accurate identification and avoids confusion between similar titles or editions.

Fig : Spine label of a book

Process – 2

Book Spine label are used to Identify the physical location of the Book.

In the figure the number 629.892 WAA, is part of the Dewey Decimal Classification (DDC) system.

This is a call number, which is found on the spine label of a book in the IICT Library, and it helps locate the physical location of the book in the library.

It has two parts:

Part 1: Dewey Decimal Number (629.892)

- The numeric part 629.892 represents the subject category.
- The Dewey Decimal System organizes knowledge into 10 broad classes, and then narrows down into more specific topics.

For example:

Dewey Number	Subject
600	Technology (Applied sciences)
620	Engineering & allied operations
629	Other branches of engineering
629.8	Automation, robotics
629.892	Robots / Robotics (Engineering)

So, 629.892 tells that the book is about robotics.

Part 2: Cutter Code (WAA)

- The Cutter code is usually an alphabetical abbreviation based on the author's last name or the book title.
- In WAA, the letters likely refer to the first letters of the author's name (Warren , Adams) Book title (Arduino Robotics) WAA.

Fig : Outside Book Entry

Process – 3

The IICT Library allows students to bring their personal books for reading within the library premises. To ensure the security of library-owned books and to prevent any mix-up with external books, a monitoring system is in place.

Upon entering the library with an outside book, students are required to record the following details in a logbook:

- Student Registration Number
- Title of the Book
- Department Name
- Current Semester

Before leaving the library, the student must strike through their entry to confirm that the personal book is being taken back and not mistakenly left or mixed with library materials. This simple yet effective system helps maintain accountability and safeguards library assets.

Fig : Student ID Card

Process – 4

To borrow a book from the IICT Library, students must present their valid Student ID card for identity verification. The library services are exclusively available to the students and staff of IICT departments, specifically: CSE (Computer Science and Engineering), SWE (Software Engineering), and EEE (Electrical and Electronic Engineering).

The Student ID card serves multiple purposes:

- Identifies the student's full name, department, season, and registration number
- Confirms the student's identity through photo verification by matching the ID image with the student's face

This process ensures secure and authorized access to library resources, helping maintain an organized and department-specific lending system.

Fig : Book borrower list

Process - 5

The Book Borrower List is maintained by the IICT Library to keep a detailed record of all individuals who have borrowed books. This ensures transparency, accountability, and easy tracking of borrowed materials.

The list includes the following columns:

- Registration Number – Unique ID used to identify the student.
- Name of the Student – Full name of the borrower.
- Phone Number – Contact information for communication or reminders.
- Department Name – Indicates the department the student belongs to (e.g., CSE, SWE, EEE).
- Accession Numbers of Borrowed Books – Each borrowed book is tracked by its unique Accession Number (e.g., I001430), ensuring accurate identification and return tracking. There are multiple columns to accommodate more than one borrowed book per student.
- When books are returned the Accession Numbers of Borrowed Books is strikethrough.

This list helps the library staff efficiently monitor borrowing activity, send timely return reminders, and manage the circulation of library materials.

Process – 6

The IICT Library maintains a separate **Faculty Book Borrower Record** to track books borrowed by teachers. This ensures proper documentation of faculty usage and helps manage library inventory efficiently.

The record includes the following columns:

- **Teacher's Name** – Full name of the faculty member borrowing the book.
- **Teacher ID** – A unique identifier assigned to the faculty by the institution.
- **Accession Number of the Book** – The unique ID assigned to each book, used to accurately track which book has been borrowed.
- **Department Name** – Indicates the department the faculty belongs to (e.g., CSE, SWE, EEE).
- **Designation** – The academic or administrative position of the teacher within the department
- **Signature** – Used for authentication and verification of the transaction.

This dedicated log ensures that faculty borrowing is well-documented, traceable, and distinct from student borrowing records.
