

IICT Library Use Case Documentation

UC-001: Book Procurement Process for IICT Library

Created By	Ariful Islam
Date	03-Aug-2025
Actor	Central Library, IICT Administration, Book Distributors
Trigger	Receipt of official application from the Central Library
Description	Outlines the process of procuring essential books for the IICT Library, starting from application to delivery and shelving.
Frequency of Use	Once per academic year
Preconditions	Central Library must prepare and send an official application including budget and request.
Non-Functional Requirement	N/A
Post Conditions	Requested books are delivered to and shelved in the IICT Library
Assumption	Budget is approved, vendors are available and cooperative
Goal	To procure and receive essential academic books within the allocated budget
Normal Flow	1. Central Library sends application 2. IICT prepares requisition 3. Vendor selection 4. Books delivered 5. Books shelved
Alternative Flow	If vendor unavailable or pricing exceeds budget, new vendor selection is initiated
Exception	N/A
Cross Reference	Annual Budget Allocation Document, Requisition Form, Vendor Bidding Reports
Notes and Issues	Delay may affect schedule. Ensure ISBN and quantity accuracy.

UC-02: Book List Entry

Created By	Your Name or Group Name
Date	03-Aug-2025
Actor	IICT Library Staff
Trigger	A new book is added to the IICT Library collection
Description	Entering metadata of a new book for cataloging, tracking, and management.
Frequency of Use	Weekly or monthly
Preconditions	Book received, staff has access to system, bill details available
Non-Functional Requirement	Validation for ISBN/date; unique accession number; search/sort support
Post Conditions	Book recorded and available for borrowing
Assumption	Book information is accurate; accession system is maintained
Goal	Accurately record book metadata in library database
Normal Flow	1. Receive book 2. Collect metadata 3. Assign accession 4. Enter in system 5. Confirm entry
Alternative Flow	If data is incomplete or duplicate accession, entry is flagged
Exception	Crash/data loss, invalid ISBN, duplicate accession number
Cross Reference	UC-05, UC-06
Notes and Issues	Ensure edition consistency; export/backup features helpful

IICT Library Use Case Documentation

UC-002: Book Spine Label Classification using Dewey Decimal System

Created By	Ariful Islam
Date	03-Aug-2025
Actor	IICT Library Staff, Library Management System, Library Users
Trigger	New book added to the IICT Library collection
Description	Assign spine label using Dewey Decimal and Cutter codes to help locate books.
Frequency of Use	Every new book cataloged
Preconditions	Book is acquired and entered into system
Non-Functional Requirement	Clear printed labels; consistent Cutter codes; searchable system
Post Conditions	Book shelved and findable by users
Assumption	Staff trained in DDC and Cutter code assignment
Goal	Classify and shelf books accurately
Normal Flow	1. Book entered 2. Assign DDC 3. Create Cutter code 4. Print label 5. Shelf book 6. User locates via catalog
Alternative Flow	Choose most relevant subject if multiple exist
Exception	Misassigned Dewey number, duplicate Cutter code, label damaged
Cross Reference	DDC System, Cataloging Policy
Notes and Issues	Training and consistency needed for accuracy

IICT Library Use Case Documentation

UC-04: Outside Book Entry

Created By	Your Name or Group Name
Date	03-Aug-2025
Actor	Student, IICT Library Staff
Trigger	Student brings a personal book into the library
Description	Log personal books on entry/exit to prevent mix-up with library books.
Frequency of Use	Occasionally
Preconditions	Student enrolled; book is personal property
Non-Functional Requirement	Readable logbook, quick process, clear format
Post Conditions	Book entry is tracked and cleared on exit
Assumption	Students honestly declare books
Goal	Avoid confusion between personal and library books
Normal Flow	1. Student enters 2. Records details 3. Reads 4. Strikes entry on exit
Alternative Flow	Staff prompts if entry is missed or incomplete
Exception	Entry refusal, invalid info, unlogged exit
Cross Reference	UC-05, general library rules
Notes and Issues	Consider digital logbook and exit check system

IICT Library Use Case Documentation

UC-05: Student Book Borrowing

Created By	Your Name or Group Name
Date	03-Aug-2025
Actor	Student, IICT Library Staff
Trigger	Student presents valid Student ID
Description	Student borrows book using ID; logged in Borrower List.
Frequency of Use	Multiple times daily
Preconditions	Student from CSE/SWE/EEE; ID valid; Book available
Non-Functional Requirement	N/A
Post Conditions	Book issued and logged
Assumption	Accurate ID check; system allows multiple books
Goal	Efficient book borrowing for students
Normal Flow	1. Present ID 2. Verify info 3. Select book 4. Log borrow 5. Hand over book
Alternative Flow	Borrow denied if ID invalid/book unavailable
Exception	N/A
Cross Reference	UC-06
Notes and Issues	Add automation; track returns and penalties

IICT Library Use Case Documentation

UC-06: Faculty Book Borrowing

Created By	Your Name or Group Name
Date	03-Aug-2025
Actor	Faculty Member, IICT Library Staff
Trigger	Faculty requests to borrow a book
Description	Faculty borrows books with records of name, ID, department, book accession, and signature.
Frequency of Use	Several times daily
Preconditions	Faculty registered and book available
Non-Functional Requirement	N/A
Post Conditions	Borrow logged; inventory updated
Assumption	Faculty data current; system working
Goal	Track and document faculty borrowing
Normal Flow	1. Request book 2. Verify ID 3. Log details 4. Sign record 5. Get book
Alternative Flow	Reserve book or deny if not available
Exception	N/A
Cross Reference	UC-05
Notes and Issues	Digital integration needed for tracking
